

INTERIOR AND EVENT DESIGN STUDIO  
THE BRU GUIDE

# HUIS BRU

A lovely story about us and our experience

## WHO WE ARE

An exciting collaboration between two energetic and passionate Event and Interior Designers (with a love for all things arty and eclectic), led to the birth of Huis Bru. With an understanding of new age environments, the need for experience and the ability to put together creative and vibrant spaces; Huis Bru offers a design studio space, a venue and a production factory. We work with reputable and local home & event service providers... and we have extensive training on each product within the Huis Bru range.

We have styled and conceptualized some of the top major events in the Western Cape, like Pink Polo, Moet Grand Day, Sun Met, Jazz Festival and many more, we have also done renovations for offices and restyled homes... see some work.

## FROM START TO END INTERIOR DESIGN AND STYLING

Huis Bru is unique in its field as we are flexible to what our clients' needs are. We are able to provide architects, plan approval and permits, builders, site managers, plumbers, electricians, carpenters, tilers, window furnishings, floor solutions, painters, decorative and soft furnishings installations, landscapers, kitchen designers, customised furniture, art, renders and concepts, design, advice and consultations and on-site styling. Our team has over 10 work experience in the events and interiors industry. Huis Bru was opened during September 2020 and focuses on using our experience to create a system that is logical to the client and brilliant quality, at affordable pricing and innovative execution. We have both obtained our degrees in Events Management and Project Management and have worked for numerous brands and private clients to execute office and home interiors and events. We have an extremely unique and eclectic way of putting things together and understanding space and environments, with this we combine our understanding and love for interesting materials and products.

# OUR PROCESS

## INITIAL CONSULTATIONS – R0

Huis Bru offers a 1 hr initial consultation free of charge, this is to ensure that our clients focus on the synergy in the project rather than feeling obligated to continue a process because they paid for it. This develops trust between the Huis Bru team and the client and allows us to engage with our clients before developing moodboards. We spend a portion of the consult discussing our clients' vision and their current living conditions, as well as their lifestyle and daily living routine. We also connect in terms of their ultimate vision and ideal space... once we have the key points, we are able to continue on to the next phase.

## MOODBOARD AND SITE CONSULTS – R1500 (+ R350 P/H IN EXCESS OF 8 HOURS)

The moodboard journey is the most crucial journey the Huis Bru team goes on with our clients, it is the phase where we showcase inspired visions and look and feels for each space within the clients home...Once our client has received their moodboard and is happy to proceed with 1) making changes and developing the vision or 2) meeting on site to discuss the vision, take measurements and have site meetings with suppliers in order to find out how far we can expand on the ultimate vision and what solutions we need to put in to place in order to ensure that the moodboard comes to life, we charge a fee of R1500... This allows our client to own the moodboard and engage with their own suppliers or decorators to show their vision and project manage their renovations themselves or as security for Huis Bru to develop your lookbook and renders and quote...

## LOOKBOOKS, DESIGN BOOK AND ROOM RENDERS (R450 P/H)

This is the phase where the client wants to proceed with Huis Bru in order to create a shopping list, style guide booklet, custom items rendered and to see their rooms come to life. This process is extensive and extremely detailed. Our clients who wish for Huis Bru to bring the moodboard to life will further receive a full detailed review of each element to be presented in the home... we ensure that we pair our trusted suppliers with the right projects and have a very reputable list of go-to-suppliers who are extremely creative and provide unique services. We create our design book by ensuring that our suppliers are able to bring our visions to life, and therefore each render will specify substrates, measurements, colour specs and visual replication of the items. We use service providers who have minimal overheads but are able to ensure that quality product is delivered, we also have trade discounts with many of our suppliers and therefore, we have freedom to design for the clients- not the supplier. Wherever possible, we will provide customised work as we also have an in-house production factory located in Hout Bay... this allows our clients to receive unique product and out the box thinking. We further extend this service by providing full 3d room renders of each space...

## QUOTING AND SPECIALISED SERVICES (R0)

We do not charge our clients to quote on jobs... we work hard at providing affordable services and end results. It is by far the most important value that we pride ourselves on. We work extremely hard at each element designed to ensure that we are competitive in terms of quality and style and perhaps unique in our affordability. Our quotes are itemised and provide detailed information. They are simple to understand and clients are able to break down the quotes in to various phases... alternatively, we always suggest going in with a bang! And getting it done all at the same time. Huis Bru has been fully trained and equipped to provide clients with technical advice on Blinds, Shutters, Concrete, Curtaining and Reupholstery. We are also trained on Somfy Home automation products and are able to provide these services in-house. Furthermore, we have samples of each product and can provide detailed prep specifications to the appointed builder to ensure that the products are installed in the correct and specified manner.

## PROJECT MANAGEMENT, ACCOUNT MANAGEMENT AND PRODUCTION (8%)

Huis Bru charges a minimal project management and account management fee of 8% of the final quote, we ensure that the entire installation from planning to production and implementation is closely managed within specified timeframes and budgets by using our project management tracking tool, Monday. We ensure that deposits are paid and that balances are paid once snags have been completed and client is satisfied with the end result. Included in this 8% is site presence of an appointed site manager throughout the renovation, this includes site inspections, preparation and installation. We also have a small travel fee included in our quotes to cover all collection, delivery and installations expenses charged by various suppliers.

## SOURCING, DELIVERY, STYLING

Huis Bru uses local and sustainable production materials and employs various suppliers who have small businesses, brilliant skill-sets and amazing quality workmanship. When purchasing direct from a retail store, we attain – as best as possible- trade discounts, or alternatively shop on sale ;) We also love to upcycle vintage and unique items from second hand stores and provide locals with opportunities to help revive the item. We are consistently aware of providing unique and innovative ways to decorate and finish off an environment and therefore, we ensure that we provide décor items that are functional and essential to the space and lifestyle of our client.

# REVIEWS FROM OUR HAPPY CLIENTS

## SAVANNAH BOSMAN

### Interior Moodboard

Amazing is honestly the only word to describe these two talented ladies.

## SEAN PATAIKI

### Full package

Thanks to both you and Erin for everything. I wish you both success and will tell all my friends if they need any help with their interior to come see you.

## KERRY FINTZ

### Brand Kit and Concept Pitch

I wouldn't be able to have taken my brand to this level. You captured exactly what I wanted. You are so good at what you do and I am so impressed with how you work.
